

NEBULA  
24" W 24" D x 24" H

The Nebula collection is drawn out of the interstellar clouds of dust and gas in space - regions where stars begin to form. Made of a woven natural fiber from the banaca tree, which is then manipulated and sculpted until it reaches its voluminous shape reminiscent of spiral nebulae.

This award-winning design debuted at Salone Satellite in Milan in 2019 and is currently in stock and available in natural color, silver, or hand-painted.
