

ARGILLA TABLE

36" L x 36" W x 18" H as shown

Custom sizing available

The Argilla Table is a study of contrasts, comprised of repeated wood slats suspended in air by a metal skeleton and disks that prevent the slats from touching one another. Its corners are adorned with nickel-plated bars of metal. Customizable in any size, shape or finish. The name comes from the Italian word for clay, which is what designer William Stuart used to make original model.
